- Lifetime guarantee on every component
- Carry up to 700lbs of extra storage on top
- Keeps your expensive tools dry and secure
- 1/8" aluminum - Half the weight of steel bodies

PICKUP PACK™

*Shown in Leopard finish. Available in Silverback, Black & Silver, HPI Black, Gladiator or Leopard.

The Pickup Pack™ is a unique alternative for companies needing organized storage and lockup security without the cost of a service body. All in an attractive aluminum body that can be easily installed on your pickup in a few hours.

This "service body" in a Pickup Pack™ includes a gull wing saddle box, two lockable low side boxes, a flat or dome center hatch, a headache rack, and a removable ladder rack. When closed, the hatch locks the tailgate, making the bed area secure and weather resistant. There is still an 8"-10" space beneath the tool boxes for sheets of plywood or other cargo.

Proudly Made in the U.S.A.
